2. *Mutilation* is a term of very general import, applied to bodies, to statues, to buildings, and to writings; but *appropriately*, it denotes the retrenchment of a human limb or member, and particularly of the male organs of generation.

We see that these words, *mutiny* and *mew*, are from the same root as L. *muto*, to change, W. *mudaw*, which is radically the same word as L. *moto*, to move. *Mutiny* is formed from the French *mutin*, a derivative word, and *mew* from the root or verb. So *motin*, in Spanish, is a derivative, while *muda*, change, and Port. *mudar*, to change feathers, are directly from the verb; Eth. ሞለጠ *mit*, to turn; Ar. ملط *malau*, to move or drive, or ماط *mata*, to drive. Class Md, No. 14, 10.]

An insurrection of soldiers or seamen against the authority of their commanders; open resistance of officers, or opposition to their authority. A mutiny is properly the act of numbers, but by statutes and orders for governing the army and navy in different countries, the acts which constitute mutiny are multiplied and defined; and acts of individuals, amounting to a resistance of the authority or lawful commands of officers, are declared to be mutiny. Any attempt to excite opposition to lawful authority, or any act of contempt toward officers, or disobedience of commands, is by the British Mutiny Act declared to be mutiny. Any concealment of mutinous acts, or neglect to attempt a suppression of them, is declared also to be mutiny.

Note. — In good authors who lived a century ago, *mutiny* and *mutinous* were applied to insurrection and sedition in civil society. But I believe these words are now applied exclusively to soldiers and seamen.

MU'TI-NY, *v. i.* To rise against lawful authority in military and naval service; to excite, or attempt to excite, opposition to the lawful commands of military and naval officers; to commit some act which tends to bring the authority of officers into contempt, or in any way to promote insubordination.

Natural philosophy originally signified the study of nature in general. > And look through *nature* up to *nature's* God. *Pope.*

2. By a metonymy of the effect for the cause, *nature* is used for the agent, creator, author, producer, of things, or for the powers that produce them. By the expression, "trees and fossils are produced by *nature*," we mean, they are formed or produced by certain inherent powers in matter, or we mean that they are produced by God, the Creator, the Author of whatever is made or produced. The opinion that things are produced by inherent powers of matter, independent of a supreme, intelligent Author, is atheism. But generally, men mean by *nature*, thus used, the Author of created things, or the operation of his power.

3. The essence, essential qualities, or attributes, of a thing, which constitute it what it is; as, the *nature* of the soul; the *nature* of blood, the *nature* of a fluid; the *nature* of plants, or of a metal, the *nature* of a circle or an angle. When we speak of the *nature* of man, we understand the peculiar constitution of his body or mind, or the qualities of the species which distinguish him from other animals. When we speak of the *nature* of a man, or an individual of the race, we mean his particular qualities or constitution, either the peculiar temperament of his body, or the affections of his mind, his natural appetites, passions, disposition, or temper. So of irrational animals.

NEI'THER, (nē'ther *or* nī'ther. The former is given in most dictionaries, and still prevails in America. The latter is now common in England,) *compound pronoun, pronominal adjective*, or *a substitute.* [Sax. *nather, nathor, nauther*, or *nouther*; *ne*, not, and *either* or *other*, not either, or not other. So in L. *neuter*, *ne* and *uter.*]
Not either; not the one or the other.
1. It refers to individual things or persons; as, which road shall I take? *Neither*, take *neither* road. The upright judge inclines to *neither* party.
It is used as a substitute; as, the upright judge inclines to *neither* of the parties.

He *neither* loves,
Nor either cares for him. *Shak.*

2. It refers to a sentence; as, "Ye shall not eat of it, *neither* shall ye touch it;" that is, ye shall not eat, *not either* or *other* shall ye touch it; ye shall not eat, nor shall ye do the other thing here mentioned, that is, touch it. *Gen.* iii.
"Fight *neither* with small nor great, save only with the king;" that is, fight not, either with small or great. 1 *Kings* xxii.
Neither, in the first part of a negative sentence, is followed by *nor* in the subsequent part. It is *neither* the one *nor* the other. But *or* would be most proper, for the negative in *neither* applies to both parts of the sentence
It is often used in the last member of a negative sentence instead of *nor*, as in the passage above cited. "Ye shall not eat it, *neither* shall ye touch it." Here *neither* is improperly used for *nor*, for *not* in the first clause refers only to that clause, and the second negative refers only to the second clause. "Ye shall *not* eat it, *nor* shall ye touch it."
In the sentences above, *neither* is considered to be a conjunction or connecting word, though in fact it is a pronoun or representative of a clause of a sentence.
3. *Neither* primarily refers to *two*; not *either* of two. But by usage it is applicable to any number, referring to individuals separately considered. Five or ten persons being charged with a misdemeanor or riot, each may say, *neither* of us was present.
4. *Neither* sometimes closes a sentence in a peculiar manner, thus: "Men come not to the knowledge of ideas thought to be innate, till they come to the use of reason; nor then *neither.*" *Locke.*
That is, *not either* when they come to the use of reason, or before.
Formerly, in *English*, as in *Greek* and *French*, two negatives were used for one negation. But in such phrases as that above, good speakers now use *either*; "nor then *either.*"

This is a genuine English use of *never*, found in our Saxon authors, and it ought to be retained. "Ask me so much dower as *never* was done;" that is, dower to any extent. The practice of using *ever* in such phrases is corrupt. It not only destroys the force but the propriety of the phrase.

Burke. Camden. Washington. Goldsmith. Hooke.

3. In no degree; not.

Whoever has a friend to guide him, may carry his eyes in another man's head, and yet see *never* the worse. *South.*

NŌ'TION, *n.* [Fr., from L. *notio*, from *notus*, known; *nosco*, to know.]

1. Conception; mental apprehension of whatever may be known or imagined. We may have a just *notion* of power, or false *notions* respecting spirit.

Notion and *idea* are primarily different; *idea* being the conception of something visible, as the *idea* of a square or a triangle; and *notion* the conception of things invisible or intellectual, as the *notion* we have of spirits. But from negligence in the use of *idea*, the two words are constantly confounded.

What hath been generally agreed on, I content myself to assume under the *notion* of principles. *Newton.*
Few agree in their *notions* about these words. *Cheyne.*
That *notion* of hunger, cold, sound, color, thought, wish, or fear, which is in the mind, is called the *idea* of hunger, cold, &c. *Watts.*

NOT-WITH-STAND'ING; the *participle* of WITHSTAND, with *not* prefixed, and signifying not opposing, nevertheless. It retains in all cases its participial signification. For example: "I will surely rend the kingdom from thee, and will give it to thy servant; *notwithstanding*, in thy days I will not do it, for David thy father's sake." 1 *Kings* xi. In this passage there is an ellipsis of *that* after *notwithstanding*. *That* refers to the former part of the sentence, *I will rend the kingdom from thee*; notwithstanding *that*, (declaration or determination,) in thy days I will not do it. In this and in all cases, *notwithstanding*, either with or without *that* or *this*, constitutes the case absolute or independent.

"It is a rainy day, but *notwithstanding that*, the troops must be reviewed;" that is, the rainy day not opposing or preventing. *That*, in this case, is a substitute for the whole first clause of the sentence. It is to that clause what a relative is to an antecedent noun, and *which* may be used in the place of it; *notwithstanding which*, that is, the rainy day.

"Christ enjoined on his followers not to publish the cures he wrought; but *notwithstanding his injunctions*, they proclaimed them." Here, *notwithstanding his injunctions* is the case independent or absolute; the injunctions of Christ not opposing or preventing.

This word answers precisely to the Latin *non obstante*, and both are used with nouns or with substitutes for nouns, for sentences or for clauses of sentences. So in the Latin phrase, *hoc non obstante*, *hoc* may refer to a single word, to a sentence, or to a series of sentences.

O.

O is the fifteenth letter, and the fourth vowel, in the English alphabet. The shape of this letter seems to have been taken from the circular configuration of the lips in uttering the sound. It corresponds in figure with the Coptic *O*, and nearly with the Syriac initial and final *vau*, and the Ethiopic *ain*. In words derived from the Oriental languages, it often represents the *vau* of those languages, and sometimes the *ain*; the original sound of the latter being formed deep in the throat, and with a greater aperture of the mouth.

In *English*, *O* has a long sound, as in *tone*, *bone*, *groan*, *cloak*, *roll*, *droll*; a short sound, as in *lot*, *plod*, *rod*, *song*, *lodge*, and the sound of *oo*, or the Italian *u*, and French *ou*, as in *move*, *prove*. This sound is shortened in words ending in a close articulation, as in *book*, *foot*.

The long sound of *O* is usually denoted by *e*, at the end of a word or syllable, as in *bone*, *lonely*; or by a servile *a*, as in *moan*, *foal*. It is generally long before *ll*, as in *roll*; but it is short in *doll*, *loll*, and in words of more syllables than one, as in *folly*, *volley*.

As a *numeral*, O was sometimes used by the ancients for 11, and, with a dash over it, (Ō,) for 11,000.

Among *the Irish*, O, prefixed to the name of a family, denotes progeny, or is a character of dignity; as, O'Neil; O'Carrol.

Among *the ancients*, O was a mark of triple time, from the notion that the ternary, or number 3, is the most perfect of numbers, and properly expressed by a circle, the most perfect figure.

O is often used as an exclamation, expressing a wish.

O, were he present! *Dryden.*

It sometimes expresses surprise.

Shakspeare uses O for a circle or oval.

1. That about which any power or faculty is employed, or something apprehended or presented to the mind by sensation or imagination. Thus that quality of a rose which is perceived by the sense of smell, is an *object* of perception. When the *object* is not in contact with the organ of sense, there must be some medium through which we obtain the perception of it. The impression which *objects* make on the senses, must be by the immediate application of them to the organs of sense, or by means of the medium that intervenes between the organs and the *objects*.

2. That to which the mind is directed for accomplishment or attainment; end; ultimate purpose. Happiness is the *object* of every man's desires; we all strive to attain to that *object*. Wealth and honor are pursued with eagerness as desirable *objects*.

1. In *philosophy*, an epithet applied to whatever is exterior to the mind, or which is the *object* of thought

or feeling; outward; external. It is opposed to SUBJECTIVE, which see for a fuller explanation.

OB'LI-GATE, *v. t.* [L. *obligo*; *ob* and *ligo*, to bind.]

To bind, as one's self, in a moral and legal sense; to impose on, as a duty which the law or good faith may enforce. A man may *obligate* himself to pay money, or erect a house, either by bond, by covenant, or by a verbal promise. A man *obligates* himself only by a positive act of his own. We never say, a man *obligates* his heirs or executors. Until recently, the sense of this word has been restricted to positive and personal acts; and when moral duty or law binds a person to do something, the word OBLIGE has been used. But this distinction is not now observed.

The millions of mankind, as one vast fraternity, should feel *obligated* by a sense of duty and the impulse of affection, to realize the equal rights and to subserve the best interests of each other. *Proudfit.*

Moral *obligation* binds men without promise or contract.

OF, (ov,) *prep.* [Sax. *of*; G. *ab*; Sw. Ice. Dan. and D. *af*; L. *ab*, but originally *af*; Gr. ἀπο. The primary sense is departing, issuing, or proceeding from; but this sense has been modified by usage.]

From or out of; proceeding from, as the cause, source, means, author, or agent bestowing.

I have received *of* the Lord that which also I delivered to you. — 1 Cor. xi.
For it was *of* the Lord to harden their hearts. — Josh. xi.
It is *of* the Lord's mercies that we are not consumed. — Lam. iii.
The whole disposing thereof is *of* the Lord. — Prov. xvi.
Go, inquire *of* the Lord for me. — 2 Chron. xxxiv.
That holy thing that shall be born *of* thee. — Luke i.

Hence *of* is the sign of the genitive case, the case that denotes production; as, the Son *of* man, the son proceeding from man, produced from man. This is the primary sense, although we now say, produced *by* man. "Part *of* these were slain;" that is, a number separate, for *part* denotes a division; the sense then is, a number *from* or *out of* the whole were slain. So, also, "some of those were slain;" that is, some *from* or *out of* the others. "I have known him *of* old, or *of* a child;" that is, *from* old times, *from* a child. "He is *of* the race of kings," that is, descended *from* kings. "He is *of* noble blood or birth, or *of* ignoble origin." "No particle of matter, or no body, can move *of* itself;" that is, by force or strength proceeding *from* itself, derived *from* itself.

"The quarrel is not now *of* fame and tribute, or *of* wrongs done," that is, *from* fame or wrongs, as the cause, and we may render it, *concerning*, *about*, *relating to*

"*Of* this little he had some to spare;" that is, some *from* the whole. It may be rendered *out of*

"*Of* all our heroes thou canst boast alone," that is, thou alone *from* the number of heroes. This may be rendered *among*.

"The best *of* men, the most renowned *of* all;" that is, the best *from* the number of men, the most renowned *from* the whole, denoting primarily separation, like *part*.

"I was well entertained *of* the English consul;" that is, entertained *from* the consul, my entertainment was *from* the consul. This use is obsolete, and we use *by* in lieu of it.

"This does *of* right belong to us;" that is, *from* right, *de jure*; our title proceeds from right.

"The chariot was all *of* cedar;" that is, made *from* cedar. So we say, made *of* gold, made *of* clay; an application corresponding with our modern use of *from*; manufactured *from* wool, or *from* raw materials. Hence we say, cloth consisting *of* wool. "This is a scheme *of* his own devising;" that is, *from* his own devising or device. "If any man minister, let him do it as *of* the ability which God giveth;" that is, as *from* the ability, as the source of action.

"*Of* happy, he is become miserable;" that is, *from* happy, *from* being happy, he has passed to being miserable. "*Of* necessity this must prove ruinous;" that is, *from* necessity, as the cause or source. "*Of* a hundred take fifty; that is, *from* a hundred, or *out of* a hundred, *from* among a hundred.

Of sometimes implies a part or share.

It is a duty to communicate *of* those blessings we have received. *Franklin.*

From is, then, the primary sense of this preposition; a sense retained in *off*, the same word differently written for distinction. But this sense is appropriately lost in many of its applications; as, a man *of* genius, a man *of* courage, a man *of* rare endowments, a fossil *of* a red color, or *of* a hexagonal figure. He lost all hope *of* relief. This is an affair *of* the cabinet. He is a man *of* decayed fortune. What is the price *of* corn? We say that *of*, in these and similar phrases, denotes property or possession, making *of* the sign of the genitive or possessive case. These applications, however, all proceeded from the same primary sense. That which proceeds from, or is produced by, a person, is naturally the property or possession of that person; as, the son *of* John; and this idea, of property, in the course of time, would pass to things not thus produced, but still bearing a relation to another thing. Thus we say, the father *of* a son, as well as the son *of* a father. In both senses, other languages also use the same word, as in the French *de, du*, and Italian, *di, del*. *Of*, then, has one primary sense, *from*, departing, issuing, proceeding *from* or *out of*, and a derivative sense denoting possession or property.

OR, a termination of Latin nouns, is a contraction of *vir*, a man, or from the same radix. The same word, *vir*, is in our mother tongue, *wer*, and from this we have the English termination *er*.

It denotes an agent, as in *actor*, *creditor*. We annex it to many words of English origin, as in *leasor*, as we do *er* to words of Latin and Gr. origin, as in *astronomer*, *laborer*. In general, *or* is annexed to words of Latin, and *er* to those of English, origin.

A connective that marks an alternative. "You may read *or* may write;" that is, you may do one of the things at your pleasure, but not both. It corresponds to *either*. You may *either* ride to London, *or* to Windsor. It often connects a series of words or propositions, presenting a choice of either. He may study law, *or* medicine, *or* divinity, *or* he may enter into trade.

Or sometimes begins a sentence, but in this case it expresses an alternative with the foregoing sentence. *Matt.* vii. and ix.

In *poetry*, *or* is sometimes used for *either*.

For thy vast bounties are so numberless,
That them or to conceal or else to tell
Is equally impossible. *Cowley.*

Or is often used to express an alternative of terms, definitions, or explanations of the same thing in different words. Thus we say, a thing is a square, *or* a figure under four equal sides and angles.

OR'DE-AL, *n.* [Sax. *ordal* or *ordal*; G. *urtheil*; D. *ordeel*. The last syllable is *deal*, to divide or distribute. The sense of the prefix is less obvious. Wilkins supposes *or* to signify *without*, as in some Saxon words it has that sense, and *ordeal* to signify without difference or distinction of persons, entire judgment. In Saxon, *ord* signifies origin, cause, beginning, prime. In G. *ur* signifies prime, very, original; *urwort*, primitive word. In Dutch, *oor* is the *ear* or *orlog*, war. But this prefix would seem to be the same as in *furlow*, (furlough;) for, in G. *urlaub*, D. *oorlof*, Dan. *orlov*, Sw. *orlof*, is a furlow, and this indicates that *or* is a corruption of *fur* or *for*. In Welsh, this word is *gordal*, which Owen compounds of *gor*, high, superior, extreme, above, and *tal*, reward, requital; and *gordal* signifies not only *ordeal*, but an over-payment, a making satisfaction over and above. *Or*, then, may signify *out*, *away*, and in *ordeal* may denote *ultimate*, *final*. But the real sense is not obvious. The practice of ordeal, however, seems to have had its origin in the belief that the substances used had each its particular presiding deity, that had perfect control over it.]

1. An ancient form of trial to determine guilt or innocence, practiced by the rude nations of Europe, and still practiced in the East Indies. In England, the ordeal was of two sorts, *fire-ordeal* and *water-ordeal*: the former being confined to persons of higher rank, the latter to the common people. Both might be performed by deputy, but the principal was to answer for the success of the trial.

Fire-ordeal was performed either by taking in the hand a piece of red-hot iron, or by walking barefoot and blindfold over nine red-hot plowshares, laid lengthwise, at unequal distances; and if the person escaped unhurt, he was adjudged innocent; otherwise he was condemned as guilty.

Water-ordeal was performed, either by plunging the bare arm to the elbow in boiling water, or by casting the person suspected into a river or pond of cold water, and if he floated without an effort to swim, it was an evidence of guilt, but if he sunk he was acquitted.

Both in England and Sweden, the clergy presided at this trial. It was at last condemned as unlawful by the canon law, and in England it was abolished by an order in council of Henry III. *Blackstone.*

It is probable our proverbial phrase, to *go through fire and water*, denoting severe trial or danger, is derived from the ordeal; as also the trial of witches by water.

2. Severe trial; accurate scrutiny.

In some words, which we have borrowed from the Greek, *p* is mute, as in *psalm, ptisan*; but is not silent in English words, unless it may be in *receipt*, and a few irregular words. *P* aspirated, or followed by *h*, represents the Greek φ, which answers to the English *f*, as in *philosophy.*

PAR'ISH, *n.* [Fr. *paroisse*; It. *parrocchia*; Sp. *parroquia*; Arm. *parres*; Ir. *parraiste*; usually deduced from the Low L. *parochia*, Gr. παροικια, a dwelling or near residence; παρα, near, and οικος, house or οικεω, to dwell; or more probably from the Greek παροχη, a salary or largess, an allowance for support, from παρεχω, to afford, yield, or supply, whence L. *parocha*, entertainment given to embassadors at the public expense; whence It. *parrocchia*. If *parish* is to be deduced from either of these sources, it is probably from the latter, and *parish* is equivalent to benefice, living, as prebend, from L. *præbeo*. In German, *pfarre* signifies a benefice or parish; *pfarrer*, or *pfarrherr*, a person, the lord of a living or parish, and this is evidently from the same root as *parson*. I know not the origin of *pfarre*, but it coincides in elements with the W. *pori*, to graze, Corn. *peuri*, L. *voro*, Gr. βορα. The Italian and Spanish words are undoubtedly from the Latin and Greek, and the French *paroisse* may be from the same source.]

PLA'TO-NISM, *n.* The doctrines of Plato and his followers. Plato believed God to be an infinitely wise, just, and powerful Spirit; and that he formed the visible universe out of preëxistent amorphous matter, according to perfect patterns or ideas eternally existent in his own mind. Philosophy he considered as being a knowledge of the true nature of things, as discoverable in those eternal ideas after which all things were fashioned. In other words, it is the knowledge of what is eternal, exists necessarily, and is unchangeable; not of the temporary, the dependent, and changeable; and of course it is not obtained through the senses; neither is it the product of the understanding, which concerns itself only with the variable and the transitory; nor is it the result of experience and observation. But it is the product of our *reason*, which, as partaking of the divine nature, has innate ideas resembling the eternal ideas of God. By contemplating these innate ideas, reasoning about them, and comparing them with their copies in the visible universe, reason can attain that true knowledge of things which is called *philosophy.* Such appears to have been the system of Plato himself, so far as it can be gathered from his Dialogues, which are not systematic treatises, but free conversations. His professed followers, the Academics and the New Platonists, differed considerably from him, yet are called *Platonists.* *Murdock.*

The person drinking *pledged* his guest by drinking first, and then handing the cup to his guest. The practice is frequent among the common people in America to this day; the owner of the liquor, taking the cup, says to his friend, *I pledge you*, and drinks, then hands the cup to his guest; a remarkable instance of the power of habit, as the reason of the custom has long since ceased.

1. Any agent capable of producing a morbid, noxious, or dangerous effect upon any thing endowed with life. All medicines possessing sufficient activity to be of much value, are always poisons in inordinate or excessive quantities; and every thing poisonous is capable of proving medicinal in suitably reduced quantities. The ancient Greeks employed the same word both for a medicine and a poison. There are as many different modes in which poisons operate as there are different and distinct medicinal powers of any material activity. According to the popular notion, those articles only are poisonous, which are capable of producing morbid, noxious, or dangerous effects, in comparatively small quantities; but there is no just foundation for such a distinction.

1. In *a philosophical sense*, the faculty of doing or performing any thing; the faculty of moving or of producing a change in something; ability or strength. A man raises his hand by his own *power*, or by *power* moves another body. The exertion of *power* proceeds from the will, and, in strictness, no being destitute of will or intelligence can exert *power*. Power in man is *active* or *speculative*. *Active power* is that which moves the body; *speculative power* is that by which we see, judge, remember, or, in general, by which we *think*.

Power may exist without exertion. We have *power* to speak when we are silent. *Locke. Reid.*

Power has been distinguished also into *active* and *passive*, the power of *doing* or *moving*, and the power of *receiving* impressions or of *suffering*. In *strictness, passive* power is an absurdity in terms. To say that gold has a *power* to be melted, is improper language; yet for want of a more appropriate word *power* is often used in a passive sense, and is considered as twofold; viz., as able to *make*, or able to *receive*, any change. *Cyc.*

2. Force; animal strength; as, the *power* of the arm, exerted in lifting, throwing, or holding.

3. Force; strength; energy; as, the *power* of the mind, of the imagination, of the fancy. He has not *powers* of genius adequate to the work.

4. Faculty of the mind, as manifested by a particular mode of operation; as, the *power* of thinking, comparing, and judging; the reasoning *powers*.

5. Ability, natural or moral. We say, a man has the *power* of doing good; his property gives him the *power* of relieving the distressed; or, he has the *power* to persuade others to do good; or, it is not in his *power* to pay his debts. The moral *power* of man is also his *power* of judging or discerning in moral subjects.

6. In *mechanics*, that which produces, or tends to produce, motion. It is opposed to the *weight*, or that which is acted upon. [See also MECHANICAL POWERS.]

7. In *optics*, the degree to which a convex lens, or concave mirror, magnifies. *Olmsted.*

8. Force. The great *power* of the screw is of extensive use in compression. The *power* of steam is immense.

9. That quality in any natural body which produces a change, or makes an impression on another body; as, the *power* of medicine; the *power* of heat; the *power* of sound.

10. Force; strength; momentum; as, the *power* of the wind, which propels a ship or overturns a building.

11. Influence; that which may prove the mind; as, the *power* of arguments or of persuasion.

12. Command; the right of governing, or actual government; dominion; rule; sway; authority. A large portion of Asia is under the *power* of the Russian emperor. The *power* of the British monarch is limited by law. The *powers* of government are legislative, executive, judicial, and ministerial.

Power is no blessing in itself, but when it is employed to protect the innocent. *Swift.*

Under this sense may be comprehended civil, political, ecclesiastical, and military *power*.

[There is no reason why the noun and verb should not both be spelled with *c*, as in *notice*, *sacrifice*, *apprentice*, and all like cases where the accent *precedes* the last syllable. The distinction in spelling between the noun and the verb properly belongs only to words which are accented on the *last* syllable, as *device* and *devise*, where the verb has the sound of *ize*. The spelling *practise* tends to give it the same sound, as we see in uneducated persons; and hence it is desirable to follow the regular analogy and write the noun and verb alike.]

See the verb.]

1. Commendation bestowed on a person for his personal virtues or worthy actions, on meritorious actions themselves, or on any thing valuable; approbation expressed in words or song. *Praise* may be expressed by an individual, and in this circumstance differs from FAME, RENOWN, and CELEBRITY, which are the expression of the approbation of numbers, or public commendation. It appears that *praise*, *price*, *prize*, are all from one root, the primary sense of which is, to lift, to raise, or rather to strain. So from L. *tollo*, *extollo*, we have *extol*. Now, in Dan. *roser*, Sw. *rosa*, signifies to praise, and it may be questioned whether this is *praise* without a prefix. The Latin *pretium*, W. *prid*, is probably from the same root, denoting that which is *taken* for a thing sold, or the *rising* or amount, as we use *high*; a high value or price; corn

As the oriental word signifies to bless, and to reproach or curse, so, in Latin, the same word, *precor*, signifies to supplicate good or evil, and *precis* signifies a prayer and a curse. In *grammar*, an epithet designating the tense which expresses action or being not perfectly past; more usually called the *imperfect* tense.

PRE'TER-IT, *a.* [L. *præteritus, prætereo*; *præter*, beyond, and *eo*, to go.]

Past; applied to the tense in grammar which expresses an action or being perfectly past or finished, often that which is just past or completed, but without a specification of time. It is called also the *perfect* tense; as, *scripsi*, I *have written.* We say, "I *have written* a letter to my correspondent;" in which sentence, the time is supposed to be not distant and not specified. But when the time is mentioned, we use the *imperfect* tense, so called; as, "I *wrote* to my correspondent yesterday." In this use of the *preterit* or perfect tense, the English differs from the French, in which *j'ai écrit hier* is correct; but I *have written yesterday*, would be very bad English.

1. In *a general sense*, a declaration, written or verbal, made by one person to another, which binds the person who makes it, either in honor, conscience, or law, to do or forbear a certain act specified; a declaration which gives to the person to whom it is made a right to expect or to claim the performance or forbearance of the act. The promise of a visit to my neighbor gives him a right to expect it, and I am bound in honor and civility to perform the *promise*. Of such a *promise* human laws have no cognizance; but the fulfillment of it is one of the minor moralities which civility, kindness, and strict integrity, require to be observed.

2. In *law*, a declaration, verbal or written, made by one person to another for a good or valuable consideration, in the nature of a covenant, by which the promiser binds *himself*, and, as the case may be, his *legal representatives*, to do or forbear some act, and gives to the promisee a legal right to demand and enforce a fulfillment.

A promise may be *absolute* or *conditional*; *lawful* or *unlawful*; *express* or *implied*. An *absolute promise* must be fulfilled at all events. The obligation to fulfill a *conditional promise* depends on the performance of the condition. An *implied promise* is one which reason and justice dictate. If I hire a man to perform a day's labor, without any declaration that I will pay him, the law presumes a *promise* on my part that I will give him a reasonable reward, and will enforce such *implied promise*.

In *grammar*, a word used instead of a noun or name, to prevent the repetition of it. The personal pronouns in English are *I*, *thou*, or *you*, *he*, *she*, *we*, *ye*, and *they*. The last is used for the name of things, as well as for that of persons. Other words are used for the names of persons, things, sentences, phrases, and for adjectives; and when they stand for sentences, phrases, and adjectives, they are not strictly *pronouns*, but relatives, substitutes, or representatives of such sentences. Thus we say, "The jury found the prisoner guilty, and the court pronounced sentence on him. *This* or *that* gave great joy to the spectators." In these sentences, *this* or *that* represents the whole preceding sentence, which is the proper antecedent. We also say, "The jury pronounced the man *guilty*; *this*, or *that*, or *which* he could not be, for he proved an alibi;" in which sentence, *this*, or *that*, or *which*, refers immediately to *guilty*, as its antecedent.

Every animal has his *proper* instincts and inclinations, appetites and habits. Every muscle and vessel of the body has its *proper* office. Every art has its *proper* rules. Creation is the proper work of an Almighty Being.

2. Particularly suited to. Every animal lives in his *proper* element.

2. Tallness. [*Not in use.*]

3. Perfect form; handsomeness.

PROP'ER-TY, *n.* [This seems to be formed directly from *proper*; if not, it is contracted. The Latin is *proprietas*, Fr. *propriété*, from which we have *propriety*.]

1. A peculiar quality of any thing; that which is inherent in a subject, or naturally essential to it; called by logicians an *essential mode*. Thus color is a *property* of light; extension and figure are *properties* of bodies.

2. An acquired or artificial quality; that which is given by art or bestowed by man. The poem has the *properties* which constitute excellence.

3. Quality; disposition.

It is the *property* of an old sinner to find delight in reviewing his own villainies in others. *South.*

4. The exclusive right of possessing, enjoying, and disposing of a thing; ownership. In the beginning of the world, the Creator gave to man dominion over the earth, over the fish of the sea, and the fowls of the air, and over every living thing. This is the foundation of man's *property* in the earth and in all its productions. Prior occupancy of land and of wild animals gives to the possessor the *property* of them. The labor of inventing, making, or producing any thing, constitutes one of the highest and most indefeasible titles to *property*. *Property* is also acquired by inheritance, by gift, or by purchase. *Property* is sometimes held in common, yet each man's right to his share in common land or stock is exclusively his own. One man may have the *property* of the soil, and another the right of use, by prescription or by purchase.

8. An estate; a farm; a plantation. In this sense, which is common in the United States and in the West Indies, the word has a plural.

The still-houses, on the sugar plantations, vary in size according to the fancy of the proprietor, or the magnitude of the *property*. *Edwards, W. Indies.*

I shall confine myself to such *properties* as fall within the reach of daily observation. *Edwards, W. Indies.*

9. Nearness or right.

Propinquity and *property* of blood. *Shak.*

10. *Properties*; the dresses and appendages used in a theater, the keeper of which is still called the *property* man. [*Obs.*] *Toone.*

I will draw a bill of *properties*. *Shak.*
High pomp and state are useful *properties*. *Dryden.*

11. Propriety. [*Not in use.*] *Camden.*

Literary property; the exclusive right of printing, publishing, and making profit by one's own writings. No right or title to a thing can be so perfect as that which is created by a man's own labor and invention. The exclusive right of a man to his literary productions, and to the use of them for his own profit, is entire and perfect, as the faculties employed and labor bestowed are entirely and perfectly his own. On what principle, then, can a legislature or a court determine that an author can enjoy only a *temporary property* in his own productions? If a man's right to his own *productions in writing* is as perfect as to the *productions* of his farm or his shop, how can the former be abridged or limited, while the latter is held without limitation? Why do the *productions of manual labor* rank higher in the scale of rights or *property*, than the *productions* of the *intellect*?

PROP'ER-TY, *v. t.* To invest with qualities, or to take as one's own; to appropriate. [*An awkward word, and not used.*] *Shak.*

PRO-PŌR'TION, *n.* [L. *proportio*; *pro* and *portio*, part or share. See PORTION.]

1. The comparative relation of any one thing to another. Let a man's exertions be in *proportion* to his strength.

2. In *mathematics*, the identity or similitude of two ratios. *Proportion* differs from *ratio*. *Ratio* is properly the relation of two magnitudes or quantities of one and the same kind; as the ratio of 5 to 10, or the ratio of 8 to 16. *Proportion* is the sameness or likeness of two such relations. Thus 5 is to 10 as 8 to 16, or A is to B as C is to D; that is, 5 bears the same relation to 10 as 8 does to 16. Hence we say, such numbers are in *proportion*. *Hutton.*

An equality of ratios; sometimes, also, the series of terms among which an equality of ratios exists. *Day.*

3. In *arithmetic*, a rule by which, when three numbers are given, a fourth number is found, which bears the same relation to the third as the second does to the first; or a fourth number is found, bearing the same relation to the third as the first does to the second. The former is called *direct*, and the latter *inverse proportion*.

4. Symmetry; suitable adaptation of one part or thing to another; as, the *proportion* of one limb to another in the human body; the *proportion* of the length and breadth of a room to its height.

7. The relation between unequal things of the same kind, by which their several parts correspond to each other with an equal augmentation and diminution, as in reducing and enlarging figures. *Encyc.*

[This more properly belongs to *ratio*.]

Harmonical or *musical proportion*, is when, of three or four quantities, the first is to the last as the difference between the two first is to the difference between the two last. Thus, 2, 3, 6, are in harmonical proportion; for 2 is to 6 as 1 to 3. Thus, 24, 16, 12, 9, are harmonical, for 24 : 9 : : 8 : 3.

Arithmetical proportion; an equality of arithmetical ratios.

Geometrical proportion; an equality of geometrical ratios. [See PROGRESSION, No. 4.]

Reciprocal proportion; an equality between a direct and a reciprocal ratio. Thus, 4 : 2 : : 1-3 : 1-6. [See RECIPROCALS and RECIPROCAL RATIO.] *Day.*

PRO-PŌR'TION, *v. t.* To adjust the comparative relation of one thing or one part to another; as, to *proportion* the size of a building to its height, or the thickness of a thing to its length; to *proportion* our expenditures to our income.

In the loss of an object, we do not *proportion* our grief to its real value, but to the value our fancies set upon it. *Addison.*

2. To form with symmetry or suitableness, as the parts of the body.

PRO-PŌR'TION-A-BLE, *a.* That may be proportioned or made proportional. This is, etymologically, the true sense of the word; but it is commonly, though erroneously, used in the sense of *proportional*, being in proportion; having a due comparative relation; as, infantry with a *proportionable* number of horse.

PRO-PŌR'TION-A-BLE-NESS, *n.* State of being proportionable.

That which is morally good is to be desired and *prosecuted*. *Wilkins.*

This word signifies either to *begin* and *carry on*, or simply to *continue* what has been begun. When I say, "I have devised a plan which I have not the courage or means to *prosecute*," the word signifies to *begin to execute.* When we say, "The nation began a war which it had not means to *prosecute*," it signifies to *continue to carry on.* The latter is the genuine sense of the word, but both are well authorized. We *prosecute* any work of the hands or of the head. We *prosecute* a purpose, an enterprise, a work, studies, inquiries, &c.

It is applied to civil suits for damages, as well as to criminal suits, but not to suits for debt. We never say a man *prosecutes* another on a bond or note, or in assumpsit; but he *prosecutes* his right or claim in an action of debt, detinue, trover, or assumpsit. So we say, a man *prosecutes* another for assault and battery, for a libel or for slander, or for breaking his close. In these cases, *prosecute* signifies to *begin* and to *continue* a suit. The attorney-general *prosecutes* offenders in the name of the king or of the state, by information or indictment.

2. The institution and carrying on of a suit in a court of law or equity, to obtain some right, or to redress and punish some wrong. The *prosecution* of a claim in chancery is very expensive. Malicious *prosecutions* subject the offender to punishment.

In England, this practice was restrained by statutes of Richard II. and Henry IV.

More sharp and penal laws were devised against *promsors*; it being enacted that whoever disturbs any patron in the presentation to a living by virtue of any papal provision, such *promsor* shall pay fine and ransom to the king at his will, and be imprisoned till he renounces such provision. *Blackstone.*

The Goth. *frod* signifies both wise, prudent, and broken; D. *vroed*, prudent. We see that *prude*, *prudent*, and *proud*, are from the same root. The sense of *brittle* would indicate that these words belong to the same family with the Dan. *bryder*, to break; and the radical elements are the same. The Welsh *prut* is from tending out or reaching, hence *pryder*, anxiety, a stretching of the mind. The sense of *prude* is probably from stretching, straitness, stiffness; and the sense of *wise* is derivative. *Prudence* is from the same root, implying care, a tension of mind.]

PRUS'SIC, (prŭs'ik,) *a.* The term *prussic acid* is now applied too vaguely and variously to answer the purpose of science. It was first applied to the sesquicyanid of iron, which is the acid of Prussian blue. It was subsequently applied to the protocyanid of iron, which is the acid of the salt erroneously called *prussiate of iron* and *potassa*; to the cyanohydric acid, which, in all probability, forms no salts at all; to the hydroguret of benzyle, or the essential oil of bitter almonds, and laurel-cherry, which is not an acid, and of course forms no salts; and to cyanogen, which is not an acid, but a compound basifying and acidifying principle. Each of the above compounds is a valuable medicine.

1. To pain; to afflict with pain, loss, or calamity for a crime or fault; *primarily*, to afflict with bodily pain; as, to *punish* a thief with pillory or stripes; but the word is applied also to affliction by loss of property, by transportation, banishment, seclusion from society, &c. The laws require murderers to be *punished* with death. Other offenders are to be *punished* with fines, imprisonment, hard labor, &c. God *punishes* men for their sins with calamities, personal and national.

2. In *a looser sense*, to afflict with pain, &c., with a view to amendment, to chasten; as, a father *punishes* his child for disobedience.

The *punishment* of the faults and offenses of children, by the parent, is by virtue of the right of government with which the parent is invested by God himself. This species of *punishment* is *chastisement* or *correction*. The *punishment* of crimes against the laws is inflicted by the supreme power of the state, in virtue of the right of government vested in the prince or legislature. The right of *punishment* belongs only to persons clothed with authority. Pain, loss, or evil, willfully inflicted on another, for his crimes or offenses, by a private, unauthorized person, is *revenge*, rather than *punishment*.

Some *punishments* consist in exile or transportation, others in loss of liberty by imprisonment; some extend to confiscation by forfeiture of lands and goods; others induce a disability of holding offices, of being heirs, and the like. *Blackstone.*

Divine *punishments* are doubtless designed to secure obedience to divine laws, and uphold the moral order of created intelligent beings.

In Law Latin, *purchase*, the noun, was written *purchacium.* The legal use of the word in obtaining writs, shows best its true origin; to *purchase* a writ, is to *sue out* a writ, that is, to seek it out; for *sue, seek*, and L. *sequor*, are all of one origin, and synonymous with *chase.* See Blackstone, b. 3, ch. 18.
